

PRESS RELEASE

Novair acquires air compressor manufacturer America Energy and continues to expand in the USA.

May 24th, 2022

Novair, the worldwide leading manufacturer of on-site gas production systems, is pleased to announce the acquisition of the air compressor manufacturer America Energy, effective May 20th, 2022.

America Energy is a US based manufacturer of air compressors and medical gas systems, offering a wide range of medical air plants, vacuum plants, and oxygen generators. Incorporating all types of compression and vacuum technologies, America Energy solutions are especially designed for the high demanding healthcare market. From its manufacturing facility of Pembroke Pines, Florida, America Energy supplies equipment and services in North, Central and South America, as well as in the Caribbeans.

As part of Novair, America Energy is gaining access to a wide range of high-end solutions complementing its existing ranges, including PSA Oxygen & Nitrogen generators, high pressure Oxygen Cylinder Filling Systems, and Medical Gas Monitoring and Distribution systems. More synergies are also to expect through NOVAIR services and engineering competencies now recognized worldwide.

Five months after the acquisition of US based oxygen generator manufacturer OGSi, Novair is pursuing its expansion in the USA. With the acquisition of America Energy, Novair gains more means to fully address the US market, adding to its catalogue Made in USA compressed air and vacuum systems, manufactured according to the US standards. Novair also gains more key engineering capacities that will benefit to the entire group.

Already counting installations in over 150 countries, Novair strengthens by this acquisition even further its global presence with a new foothold in such an important country as the USA. Novair is thus taking a new step forward to consolidate its position of worldwide leading manufacturer of on-site gas production systems.

The whole Novair Team based in France, Italy and the USA is thrilled to welcome America Energy teams within the Group and cannot wait to start this exciting collaboration.

About NOVAIR

Worldwide leading manufacturer of on-site gas production systems, Novair is the founder of the Green Oxygen concept, with the vision that decentralized on-site medical oxygen production is the only low-carbon way to supply oxygen to hospitals. With now 45 years of presence on market and with high-tech R&D centers in France, USA and Italy, Novair definitively leads the world innovation in on-site gas production by adsorption systems.

Headquartered in France, Novair is operating in over 150 countries and counts thousands of gas generators installed around the planet supplying daily medical oxygen to hundreds of thousands of patients over the world. Novair also serves industrial oxygen and nitrogen to numerous Industries in many different applications and market segments.
